PROFILE

Computer Science undergraduate at the University of Westminster (IIT, Colombo) seeking a Software Engineer Internship to apply and further develop my technical skills in a professional environment. Experienced in full-stack development, mobile application development, and AI-integrated systems, with strong proficiency in Java, Python, JavaScript, and Flutter. Proven ability to design and build practical, user-focused solutions across web, desktop, and mobile platforms. Passionate about software engineering, continuous learning, and developing innovative technologies that solve real-world problems while contributing effectively to collaborative teams.

PROJECTS

AI-Powered Agile Task Recommendation System 2026 | MSc Research Project

MERN Stack (React, Node.js, Express, MongoDB) + Python ML Microservice (Flask, sentence-transformers, scikit-learn)

- Built a full-stack web application for Agile sprint management with team workspaces, JWT authentication, and real-time sprint board UI.
- Developed a Python ML microservice integrating NLP-based skill matching using sentence-transformer embeddings to automatically map task descriptions to developer skill profiles.
- Implemented collaborative filtering on historical assignment data to generate personalised task recommendations, targeting a 10%+ accuracy improvement after 100 feedback interactions.
- Designed a real-time capacity-aware scoring engine to prevent developer over-allocation, aiming for a 15% reduction in workload imbalance (Gini coefficient) vs. random assignment.
- Built a live accept/reject feedback loop that incrementally retrains the recommendation model within each 2-week sprint cycle.

Govi Sahaya — Agriculture Support App 2026

Flutter, Dart, AI (Image Classification)

- Developed an AI-integrated cross-platform mobile app for crop disease detection with personalised treatment guidance, supporting Sinhala and English.
- Designed a multilingual interface with farming tips, seasonal alerts, and a structured knowledge library for rural farming communities in Sri Lanka.

Marketplace Web Application 2025

PHP (Symfony), MySQL, HTML/CSS, JavaScript

- Built a full-featured marketplace platform with CRUD functionality for adverts, user authentication, and role-based access control.
- Integrated SQL database with Symfony ORM, implementing secure session management and form validation.

SmartCampus API — Room & Sensor Management System 2025

Java (JAX-RS), RESTful API Design

- Developed a RESTful API for managing rooms, sensors, and real-time sensor data using a layered MVC architecture with exception handling and logging.
- Implemented full CRUD operations with in-memory data storage and clean API contracts.

Employee Management System 2025

JavaFX, FXML, OOP

- Built a desktop CRUD application with modular OOP design, search/filter features, validation, and persistent file storage.

TECHNICAL SKILLS

Languages	Java, Python, JavaScript (ES6+), Dart, PHP, HTML5, CSS3
Frameworks	React.js, Node.js, Express.js, Flutter, Symfony, Flask, FastAPI
Databases	MongoDB, MySQL, PostgreSQL
ML / AI	scikit-learn, sentence-transformers, collaborative filtering, image classification
Tools	Git, GitHub, Docker, VS Code, IntelliJ IDEA, Postman, Tailwind CSS
Concepts	REST API design, OOP, full-stack development, microservice architecture, CRUD applications, JWT authentication

EDUCATION

BSc (Hons) Computer Science 2025 – Present

University of Westminster, UK affiliated with Informatics Institute of Technology (IIT), Colombo

- Relevant modules: Data Structures & Algorithms, Object-Oriented Programming, Web Development, AI Fundamentals.

G.C.E. Advanced Level — Mathematics Stream 2020 – 2023

Prince of Wales' College, Moratuwa

G.C.E. Ordinary Level 2018 – 2019

Prince of Wales' College, Moratuwa Completed including Mathematics, Science, English

CERTIFICATIONS

Certificate in English Language (Merit Pass) NIBM

Supervised Machine Learning: Regression and Classification — DeepLearning.AI & Stanford University

Advanced Learning Algorithms — DeepLearning.AI & Stanford University

AI for Medical Diagnosis — DeepLearning.AI

AI for Medical Prognosis — DeepLearning.AI

VOLUNTEERING & PARTICIPATION

Volunteer — Algorand Foundation IIT Blockchain Workshop 2025

- Participated as an active volunteer in the IIT Blockchain Event, engaging with blockchain fundamentals and the Algorand ecosystem.

LANGUAGES

English (Professional proficiency) | Sinhala (Native)
